Executive Summary

MetaViral is a decentralized all-in-one ecosystem on the MetaViral blockchain which is one of the fastest-growing and safest Blockchain protocols. Our team developed the community-driven project. We aim to take cryptocurrency to new heights. We aim to be a platform that will provide all facilities under a single platform. MetaViral will be a whole ecosystem that will provide features like Staking, NFT Marketplace, Swapping, exchange, and Metaverse in the future. MetaViral will develop its own unique NFT marketplace and will connect the decentralized community. Stake your NFT, earn coins and use it on our marketplace to buy different things.

The main value proposition for investors in MetaViral is exposure to a new brand of the community-funded crypto movement. By buying into the MetaViral coin community, investors are joining a revolution that is foremost motivated by the spreading of goodwill and the execution of common goals between like-minded individuals. We are going to create a brand in the crypto industry.

MetaViral is a decentralized all in one ecosystem which is one of the fastest growing and safest Block chain protocols. Our team developed a community driven project. We aim to take crypto ADOPTION to a new height through our various social media communities built to attract new users on daily basis.

MetaViral project includes MetaViral APP which is one of the fastest growing social media platform with every new member automatically adopting the MetaViral coin and crypto currency in general. Post, comments and all reaction on MetaViral APP are all rewarded with Earning from the MetaViral blockchain

MetaViral Chat is a messaging App built with MetaViral blockchain integration with great EARNINGS for all users. MetaViral Trends is the third project for the MetaViral ecosystem with MetaViral Play as the forth. All projects are integrated into the MetaViral Blockchain and paying out various Earnings to every user on these social Meedia platforms thereby making ADOPTION of the MetaViral Coin very rapid and successful.

On regular social Media platforms such as YouTube only content providers earn from their content On MetaViral both content user provider and content user are rewarded with great Earnings from the MetaViral Blockchain MetaViral has built its own Centralized and decentralized Exchanges making it easier for the projects visibility and availability on staking, Launchpad, P2P and trading. Getting onboard this project is getting on board a new trend and Revolution that will change the crypto and social media Landscape.

Three most important attribute of the MetaViral project are as follows

1. 100% of all income from our Social Media projects are converted from fiat to Metaviral
2. 30% to 50% of all sales are reserved in Gold not fiat to support MetaViral withstand Market Shocks.
3. There is Specific amount of MetaViral release on the Market yearly over a span of 30 years to control excessive supply in other to see price move upwards and sustain up to benefit of users.

Introduction

MetaViral is a modern-day all-in-one decentralized cryptocurrency platform on MetaViral BlockChain. MetaViral is a high-performance club that offers a variety of services on a single platform.

A full ecology will be built around MetaViral, with features like staking, NFT Marketplace, MetaViral Metaverse, and an exchange, as well as Liquidity Pool. MetaViral will create its own NFT marketplace and serve as a hub for the decentralized community. Stake your NFT, gain coins, and spend them on our marketplace to buy real-world items. Our NFT collections are unique in that only one may exist, and they are difficult to duplicate. As a result, it's safe to suppose that you'll be one of the few people who have these treasures.

It is focused on building the best social media community for crypto and MetaVerse Lovers.

Users will be able to earn yield in the form of MetaViral coins by staking. We are changing the market with a decentralized global financial system that is more transparent, accessible, and fair. Our first blockchain is the MetaViral blockchain.

Technology will enable a financial revolution, allowing everyone to be more financially linked and empowered. MetaViral aims to give security, transparency, high deposit and withdrawal limits, and higher odds. In a nutshell, MetaViral is a single-form solution-based ecosystem.

Mission

Our mission is to take "MetaViral" to new heights by offering customers an innovative, Eco-friendly one-stop-shop where they can not only find everything they need to buy but also research and make a more informed decision, all while utilizing a decentralized blockchain platform to give everyone in the world an equal chance to manage and improve their financial security.

Our mission is to provide a platform where ordinary people, along with affluent investors, can also invest in the welfare of people all over the world. We aim to provide a better alternative for people to invest in MetaViral is an innovative way to boost Individuals of the world, Small Businesses and large Corporations.

Our mission is:

Our mission is to create the highest quality art, community experience, and overall to help you express yourself.

Operate as a community-focused and community-driven digital asset, fully decentralized in every sense of the word.

Decrease volatility and increase positive price pressure in digital asset staking.

Lower the barrier for entry to a more advanced financial ecosystem.

Our mission is to create an immutable, transparent, secured, and asset-backed cryptocurrency.

We will create a unique and innovative NFT and Staking platform to work on our blockchain.

Vision

Everyone participating in the project is working toward the same end goal as a result of the MetaViral Ecosystem. We envision a world where wealth-building strategies that were once only accessible to affluent individuals become available to everyone, transferring the power over our financial systems back to the people. MetaViral is going to create a revolutionary ecosystem to bring more people into digital assets, helping to earn a passive income through redistribution/reflection, by holding the coin long-term, along with maintaining their privacy, security, and autonomy along with digital and social problems. MetaViral is going to create a revolutionary gaming ecosystem to bring more people into digital assets, Building a safe and secure legal crypto online gaming platform that is positioned for global adoption with no limitations helping to earn a handsome income.

Community-Focused

Growing the Decentra network by the people for the people

Innovation

To be the world's most crypto-centric platform

All in one Ecosystem

Providing all facility under an umbrella

MetaViral BLOCKCHAIN

The MetaViral Block chain is a decentralized, public block chain led by a global developer community.

It's fast, energy-efficient, and reliable. With the ease of development, low transaction costs, and a knowledgeable community, it provides developers with a robust open-source foundation for executing on the most demanding projects—without hurting the environment.

The screenshot shows the MetaViral blockchain explorer website. At the top, there's a navigation bar with 'Home', 'Blockchain', 'Tokens', 'Resources', and 'Sign In'. The main header is 'MTV Smart Chain' with a search bar and a 'MetaViral' advertisement. Below the header, there are four main sections: 'PRICE' showing \$0.05 with a +0.00% change; 'MARKET CAP' at \$500,000,000,000.00 (10,000,000,000,000 MTV); 'TRANSACTIONS' at 2786; 'MED GAS PRICE' at 1.000928041 Gwei (\$0); 'LAST FINALIZED BLOCK' at 417509; and 'TRANSACTION HISTORY IN 12 DAYS' with a line graph. At the bottom, there are two tables: 'Latest Block' and 'Latest Transactions'.

CORE VALUES OF MTV

Community

The MTV ecosystem's most valuable asset is its community. We wondered at first if a project could flourish based on a decentralized, community effort. Due to the power of its community members and investors, MTV was able to win.

Utility

In the crypto realm, we believe utility is the cornerstone of value. The MTV platform was established on the belief that the crypto sector is severely underutilized. We believe that utility will drive crypto adoption and growth and that the MTV will be the crypto ecosystem that people adopt because of its utility-focused nature.

Inclusivity

Inclusivity is at the very heart of our mission here at MTV. We believe that anyone, regardless of race, gender, or religion should have easy access to wealth generation. Unfortunately, not everyone has disposable income. With MTV, your income or access to capital is irrelevant to your ability to generate wealth.

Interconnectivity

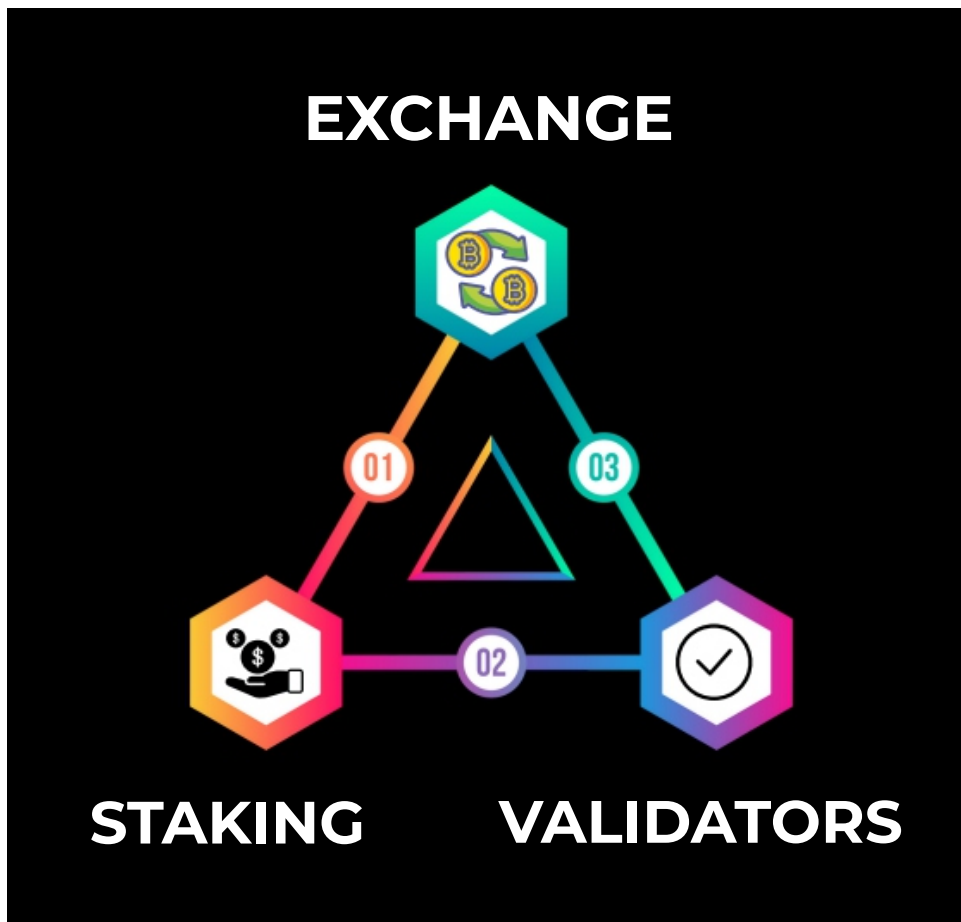

Simply said, every component of a system interacts with and is reliant on the others. MTV believes in building a linked system of mutual trust and trustworthiness, where the sum of its parts is more than the sum of its parts.

ECOSYSTEM

Our Ecosystem contains :

- Staking
- Mining
- DEX
- NFT marketplace

MetaViral Staking

MetaViral works on Blockchain, which is eco-friendly, working on a proof of stake. In addition to being one of the largest crypto exchanges by trading volume, it offers exemplary staking services. MetaViral ensures users' funds are safe by leveraging effective security measures and providing a Secure Asset Fund for Users (SAFU). Our staking method at the time of writing is arguably one of the safest and eco-friendliest methods (for cryptocurrency) to earn passive income. The platform stores all staked coins using a secure wallet and a double-checking system.

MetaViral staking is quickly becoming a practice of gaining passive income by merely storing or locking funds in a wallet as more individuals, including institutional investors understand the crypto market's lucrativeness.

The staking network provides you with the necessary skills and information and authenticates stakes on your behalf for a small part of your staking profits, allowing you to earn massive returns, which are rather substantial. Staking platforms that enable investors to essentially obtain staking rewards have popped up in response to the rapid growth of crypto staking stealthily. Therefore, if you're looking to earn a very passive income through Staking, this is essentially the place to be, which is quite significant. The MetaViral enables users to stake, store, and exchange cryptocurrency.

- Simple to operate. It works just like any other program or wallet that you use daily.
- Extremely secure. It's just a case of safeguarding your private key.
- Enables cross-border transactions in real-time. And they are barrier-free, intermediary-free transactions.
- Transaction costs are minimal. Transferring money is much cheaper than with conventional institutions.
- Enables cross-currency transactions. This enables you to do simple currency conversions.

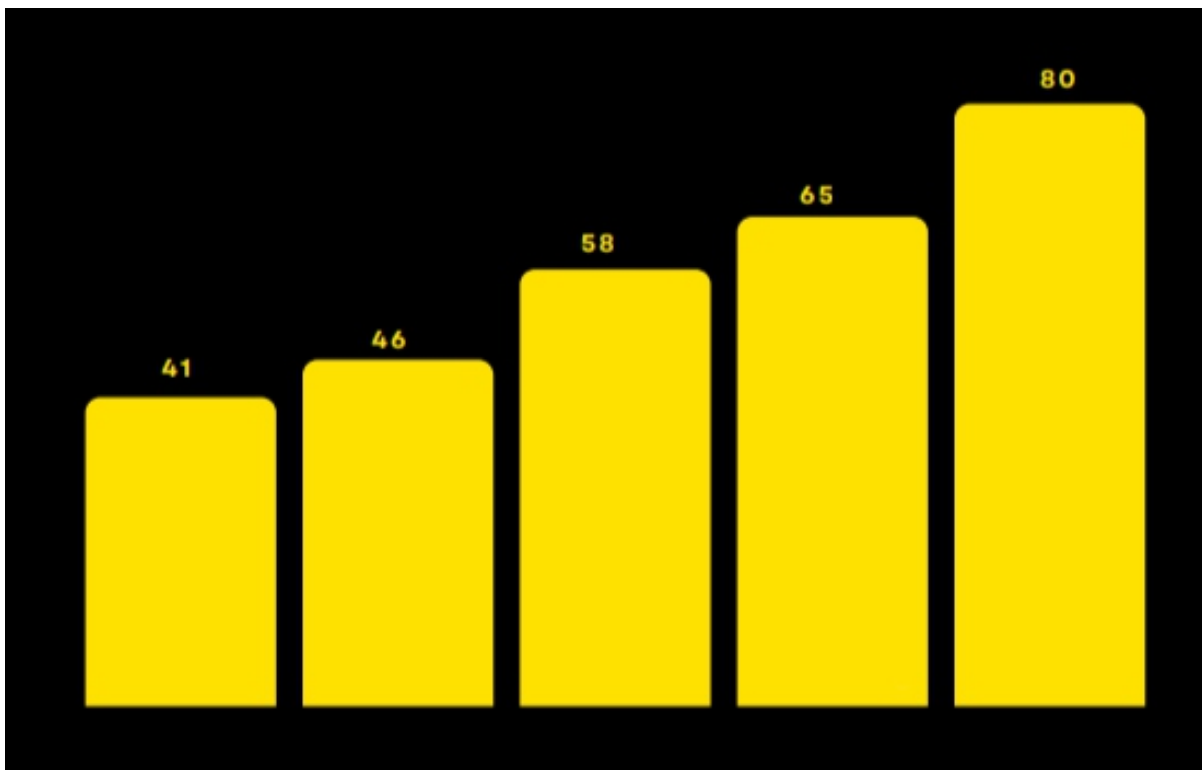

Global NFT Marketplace

According to a recent estimate from blockchain analytics firm Chainalysis Inc., about \$41 billion worth of crypto was connected with smart contracts related to NFT markets and collections from the beginning of 2021 until mid-December.

Last year, the popularity of non-fungible coins (NFTs) skyrocketed, with multimillion-dollar sales, and celebrities like musician Shawn Mendes, socialite Paris Hilton, and former first lady Melania Trump are on board.

The NFT market is predicted to expand at least 33% annually, reaching \$80 billion in net sales volume by 2025 and almost \$350 billion by 2030. Though this may appear to be a large amount, we are convinced that the market's real growth will much exceed the investment Jefferies' forecasts.

MTV NFT

An MetaViral, NFT is a digital asset that represents real-world objects like art, music, in-game items, and videos. They are bought and sold online, frequently with cryptocurrency, and they are generally encoded with the same underlying software as many cryptos.

A non-fungible coin (NFT) is financial security consisting of digital data stored in a blockchain, a form of a distributed ledger. The ownership of an NFT is recorded in the blockchain and can be transferred by the owner, allowing NFTs to be sold and traded. NFTs typically contain references to digital files such as photos, videos, and audio. Because NFTs are uniquely identifiable, they differ from other cryptocurrencies, which are fungible. The market value of an NFT is associated with the digital file it references.

The transparent nature of the underlying code means that the scarcity and ownership of any given coin are evident without the need for a trusted intermediary. We view the emergence of NFTs as a continuation of a paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles. MetaViral is a widely known NFT project. The underlying coin for each MetaViral encodes a unique genome that defines its appearance, traits, and hereditary lineage. MetaViral cannot be replicated and cannot be transferred without the user's permission.

Everyone in the digital world asserts that NFTs give a public certificate of authenticity or proof of ownership, but the legal rights conveyed by an NFT are not always clear. The blockchain defines ownership of an NFT as having no inherent legal meaning and does not necessarily give copyright, intellectual property rights, or other legal rights over the linked digital file. An NFT does not hinder the sharing or copying of its associated digital file, nor does it prevent the production of NFTs that reference identical files.

First of all, as I always emphasize on this point that is the only all-in-one NFT marketplace built for collectors and creators.

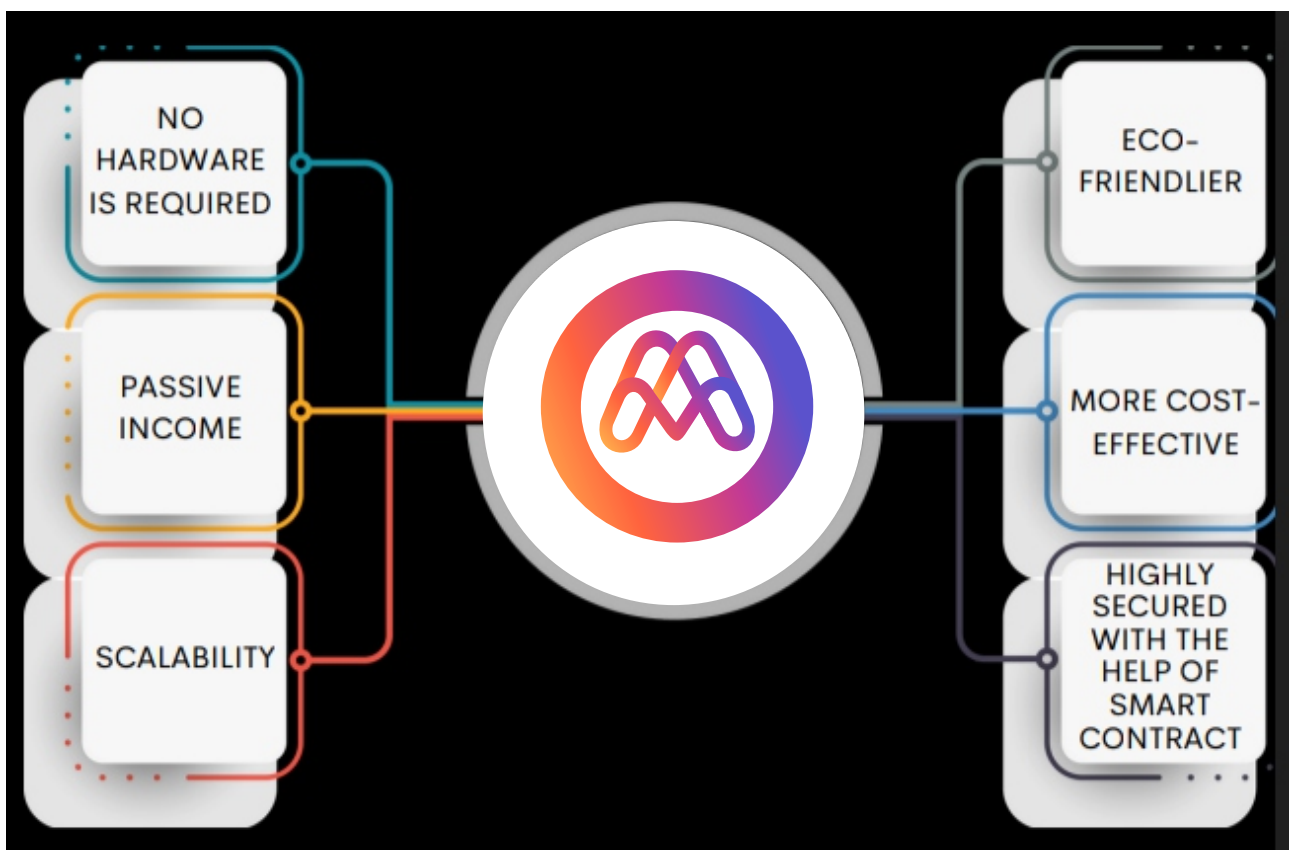

Staking and its Benefits

Staking is useful in crypto-currency since it creates incentives and passive revenue by keeping the coin on any exchange. In a decentralized environment, holding a currency and staking the pool is the most convenient option. There is a lot more energy used and a lot more chance of losing money while staking than with any other kind of crypto mining. MetaViral is here to help.

There are a few quantifiable benefits of Staking coin with MetaViral ecosystem:

MTV NFT Marketplace

NFTs are rapidly sweeping the world of digital art and collectibles. Digital artists' lives are being transformed as a result of massive sales to a new crypto-audience. Non-fungible is an economic word that can be used for objects like furniture, music files, and computers. Because of their unique features, some goods cannot be substituted for other items.

Fungible goods, on the other hand, can be swapped because their worth, not their unique features, characterizes them. At any given time, an NFT can only have one owner. The unique ID and metadata that no other coin can replicate are used to manage ownership. Smart contracts that assign ownership and govern the transferability of NFTs are used to create them.

The NFT technology gives you the peace of mind that no matter what happens to the blockchain, nodes will always be operational. As a result, nothing can really happen to the information. This is due not only to the money they produce but also to the money they safeguard.

The MetaViral Universal Marketplace allows all players in the game to purchase and sell any asset type, as well as publish job postings for in-game jobs that are compensated. The bulk of the assets traded in the Marketplace will have been earned via in-game activities. It is also a place to keep track of assets acquired through pre-sale and idea sales. Other participants will either put bids or accept the price limit as is. All assets are considered deflationary due to the permanent loss during regular economic activity. Unlike typical online games, this deflationary asset-burning mechanism ensures that assets are unique and limited in availability.

What is NFT used for?

People interested in Crypto-trading and people who like to collect artwork often use NFTs. Other than that, it has some other uses too like:

Digital Content

The most significant use of NFTs today is in digital content. Content creators see their profits enhanced by NFTs, as they power a creator economy where creators have the ownership of their content over to the platforms they use to publicize it.

Gaming Items

NFTs have garnered considerable interest from game developers. NFTs can provide a lot of benefits to the players. Normally, in an online game, you can buy items for your character, but that's as far as it goes. With NFTs, you can recoup your money by selling the items once you're finished with them.

Investment and Collaterals

Both NFT and DeFi (Decentralized Finance) share the same infrastructure. DeFi applications let you borrow money by using collateral. NFT and DeFi both work together to explore using NFTs as collateral instead.

Domain Names

NFTs provide your domain with an easier-to-remember name. This works like a website domain name, making its IP address more memorable and valuable, usually based on length and relevance.

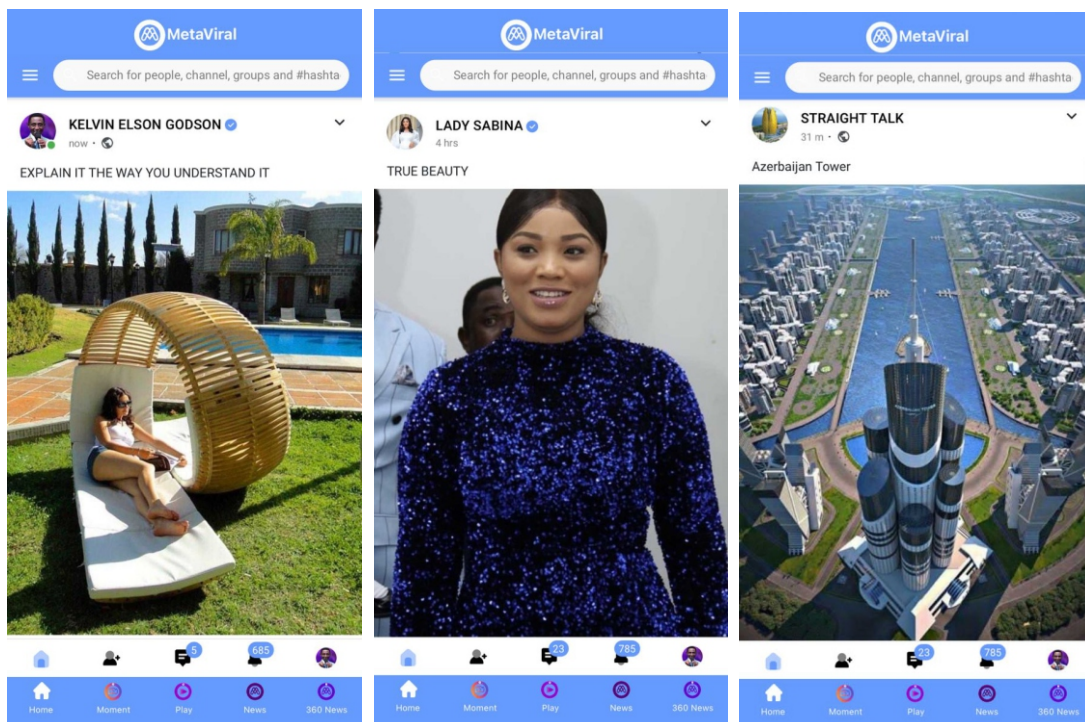

METAVIRAL

MetaViral brings a whole new experience to social media. It does not just allow users on the platform to interact and have fun but also rewards its user with earnings for whatever they do. MetaViral rewards its users with earnings for their posts, likes, shares, comments and video views. Content creators can also set up their own subscription charges on channels which allows users pay to view their contents.

Enjoy amazing new experiences in the first ever Web 3 social media community that provides real time earnings for every activity. MetaViral provides it users the platform to earn while having fun. Accumulate points and receive MetaViral (MTV) as you LIKE, SHARE, COMMENT AND POST within the MetaViral Community. All accumulated points are swapped automatically into MetaViral (MTV) and available on your wallet for withdrawal. Users are also allowed to monetize their content at their own rate. An amazing and unique feature on MetaViral is that it allows you to mint your pictures and videos on your NFT minting platform and made available on our NFT market place.

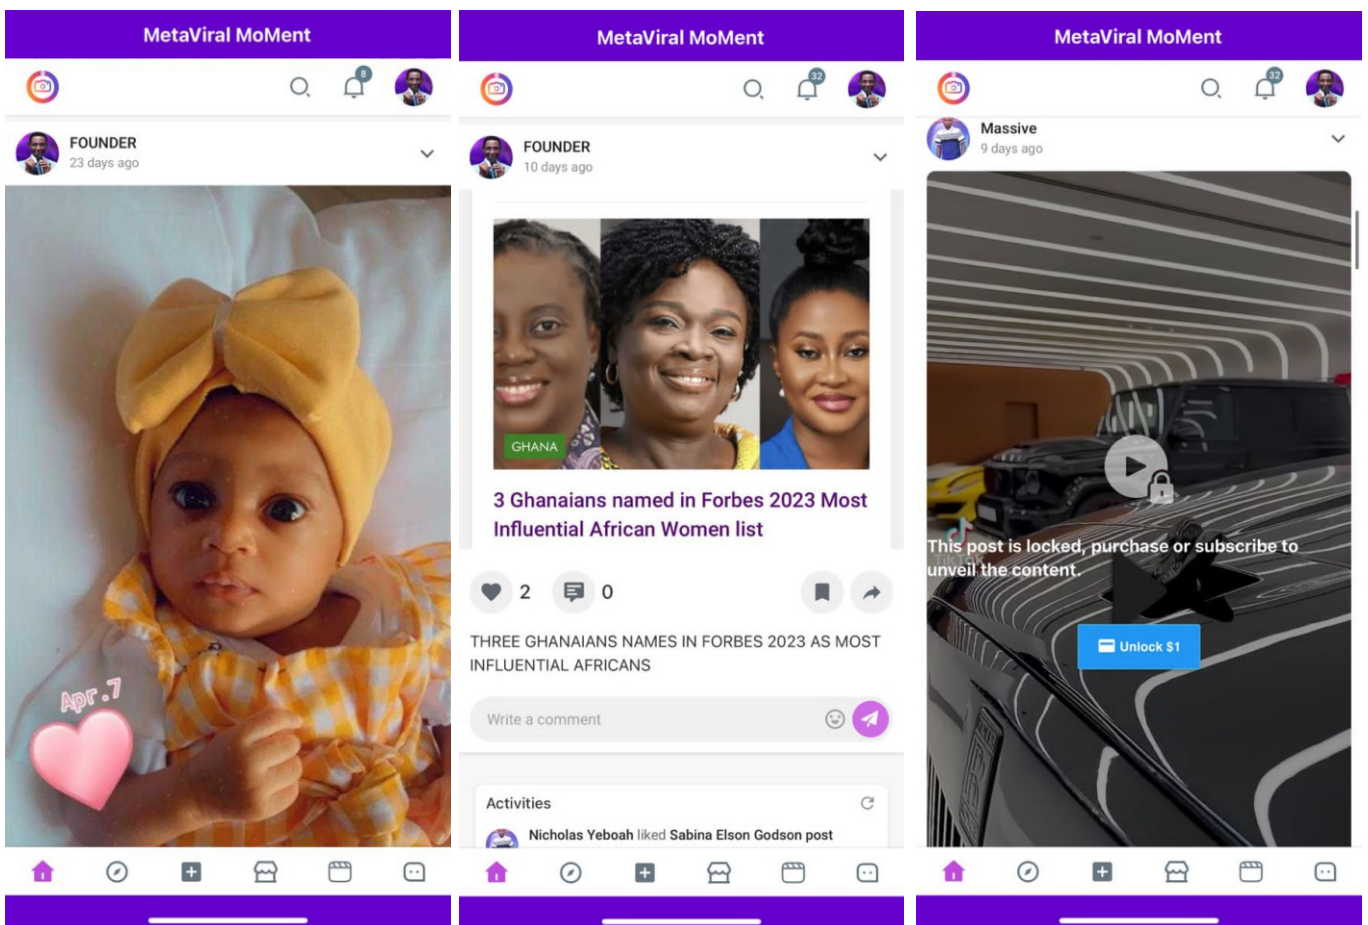

METAVIRAL MOMENTS

MetaViral Moment is a photo and video sharing social networking platform. The app allows users to upload media that can be edited with filters and organized by hashtags and geographical tagging. Posts can be shared publicly or with preapproved followers. Users can browse other users' content by tag and location, view trending content, like photos, and follow other users to add their content to a personal feed. On MetaViral Moments, earnings accrue for your posts likes, comments, shares and video views.

Having fun with pictures and video just became better and a way of earning passive income as you mint both pictures and videos into NFTs and become a celebrity with a click of a button. All accumulated points are paid with MetaViral

METAVIRAL ROOM

Pay no more for Video and Audio conference but get paid for your public video and audio conference as your followers COMMENT, LIKE, VIEW AND SHARE. Stay connected wherever you go - start or join a secure meeting with flawless video and audio, instant screen sharing, and cross-platform instant messaging on MetaViral Room.

MetaViral Room is here for you. We are here to help you connect, communicate, and express your ideas so you can get more done together. MetaViral Room allows unlimited group membership, it your ideal app, suitable for your video/audio meetings and conferences. We are proud to be trusted by millions of enterprises, small business, and individuals, just like you. Enjoy real timequick conversations on MetaViral Room.

This is to aid the free flow of AMA for Crypto Platforms and exchanges.

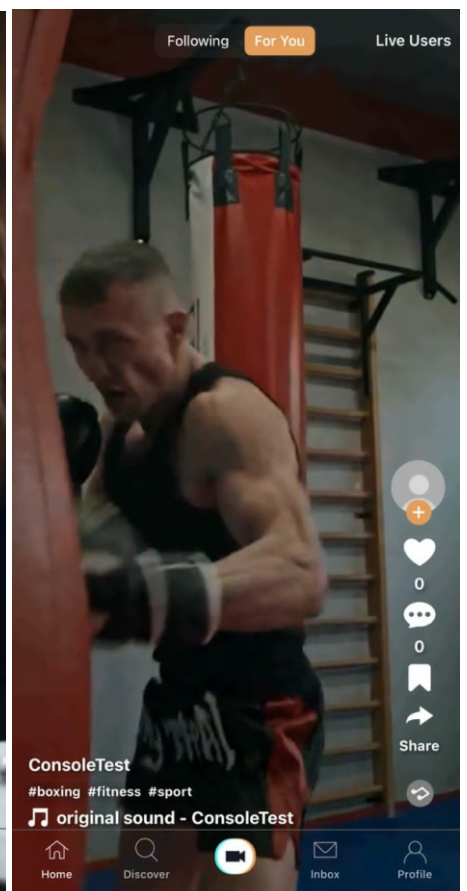

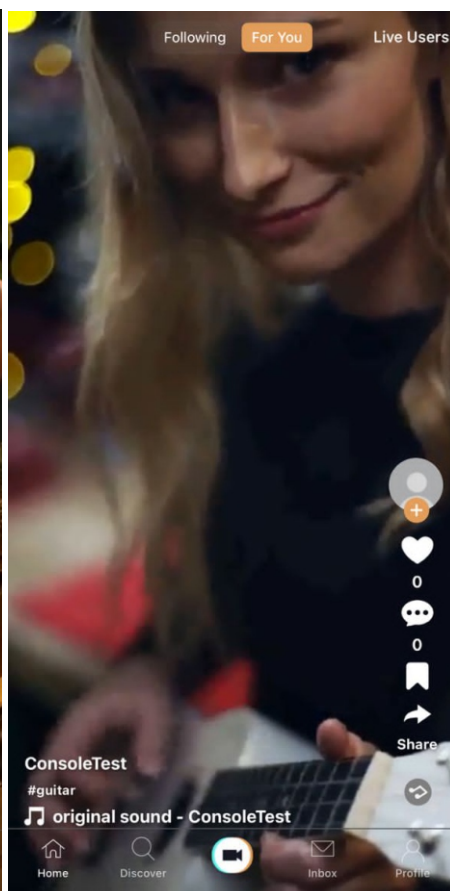

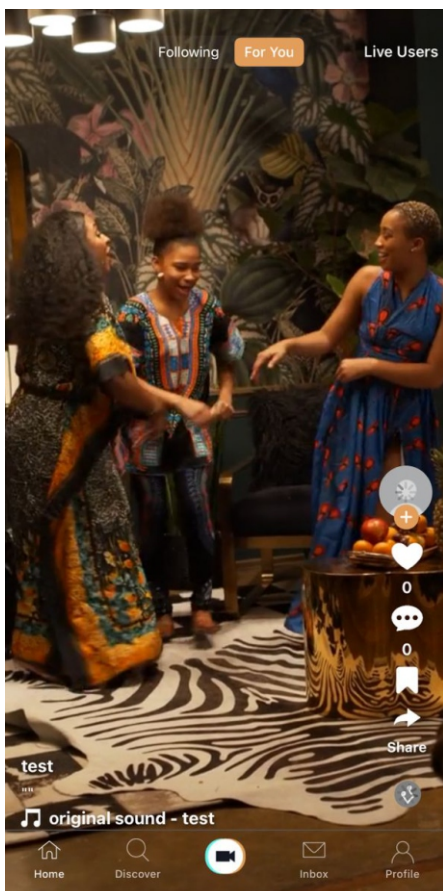

METAVIRAL FUN

MetaViral Fun, is a short-form video hosting social media network. It hosts user-submitted videos and rewards its user with earnings for video postings and viewing.

With its personalized feeds of quirky short videos set to music and sound effects, the MetaViral Fun is notable for its addictive quality and high levels of engagement.

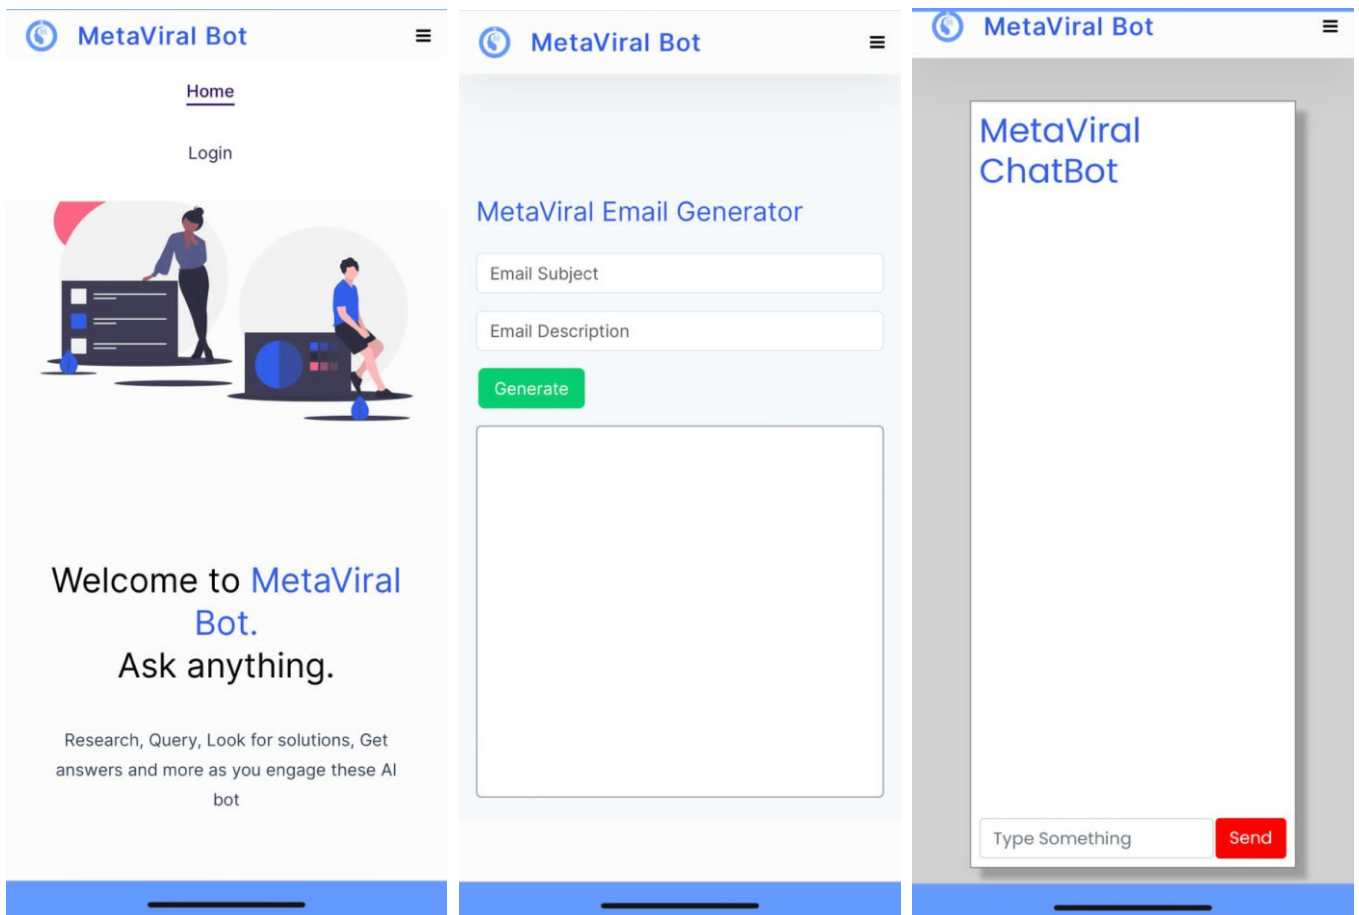

Amateur and professional creators alike can add effects like filters, background music, and stickers to their videos, and can collaborate and create split-screen duet video even if they are in different locations.

METAVIRAL BOT

MetaViral Bot is an artificial intelligence chatbot developed by Open AI. It is built on top of OpenAI's GPT-3.5 and GPT-4 families of large language models (LLMs) and has been fine-tuned (an approach to transfer learning) using both supervised and reinforcement learning techniques. MetaViral Bot provides detailed responses and articulate answers across many domains of knowledge.

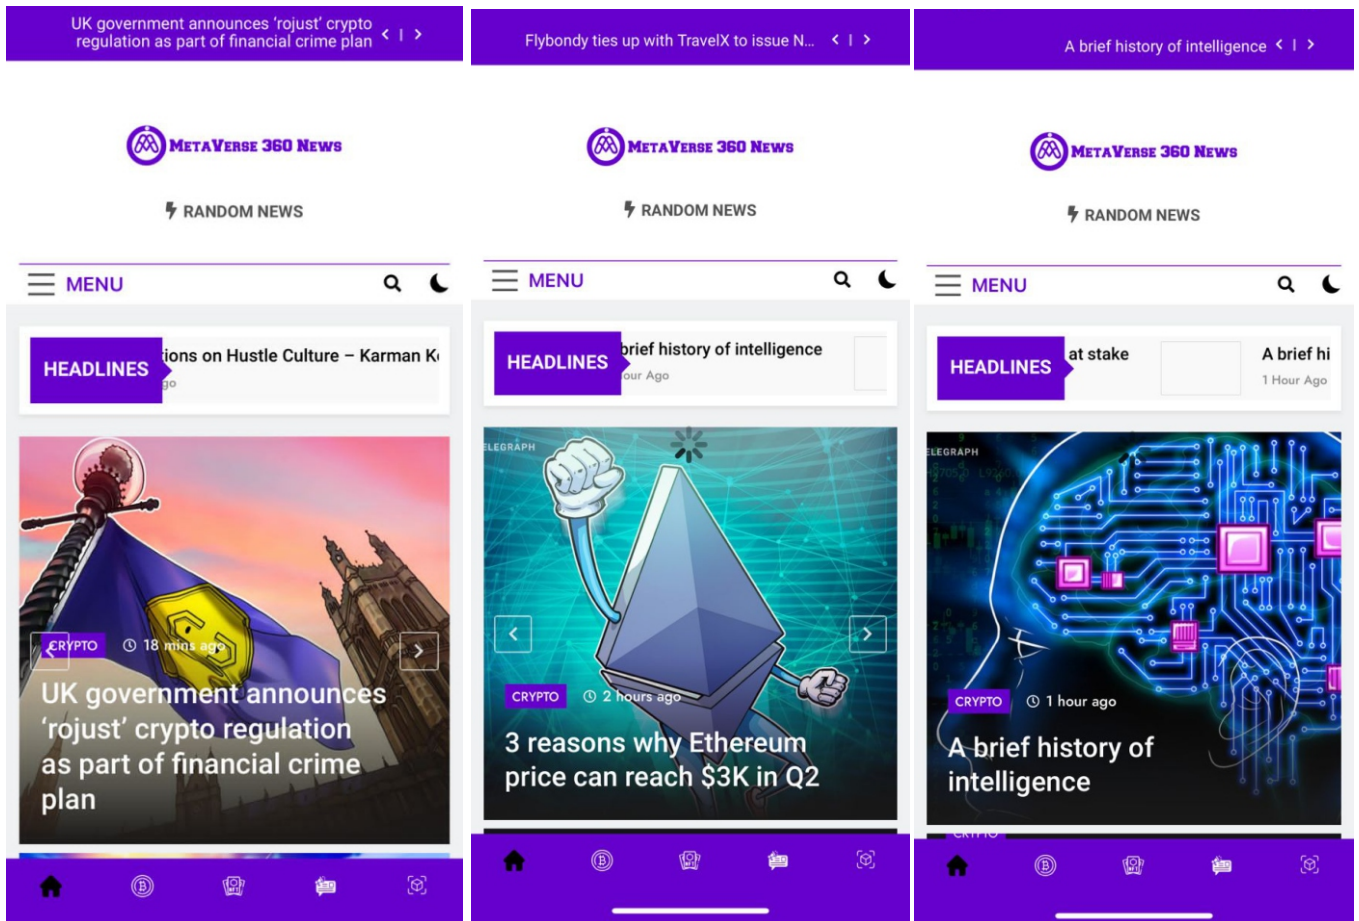

METAVVERSE 360 NEWS

Metaverse 360 provides the latest trending news in the Metaverse.

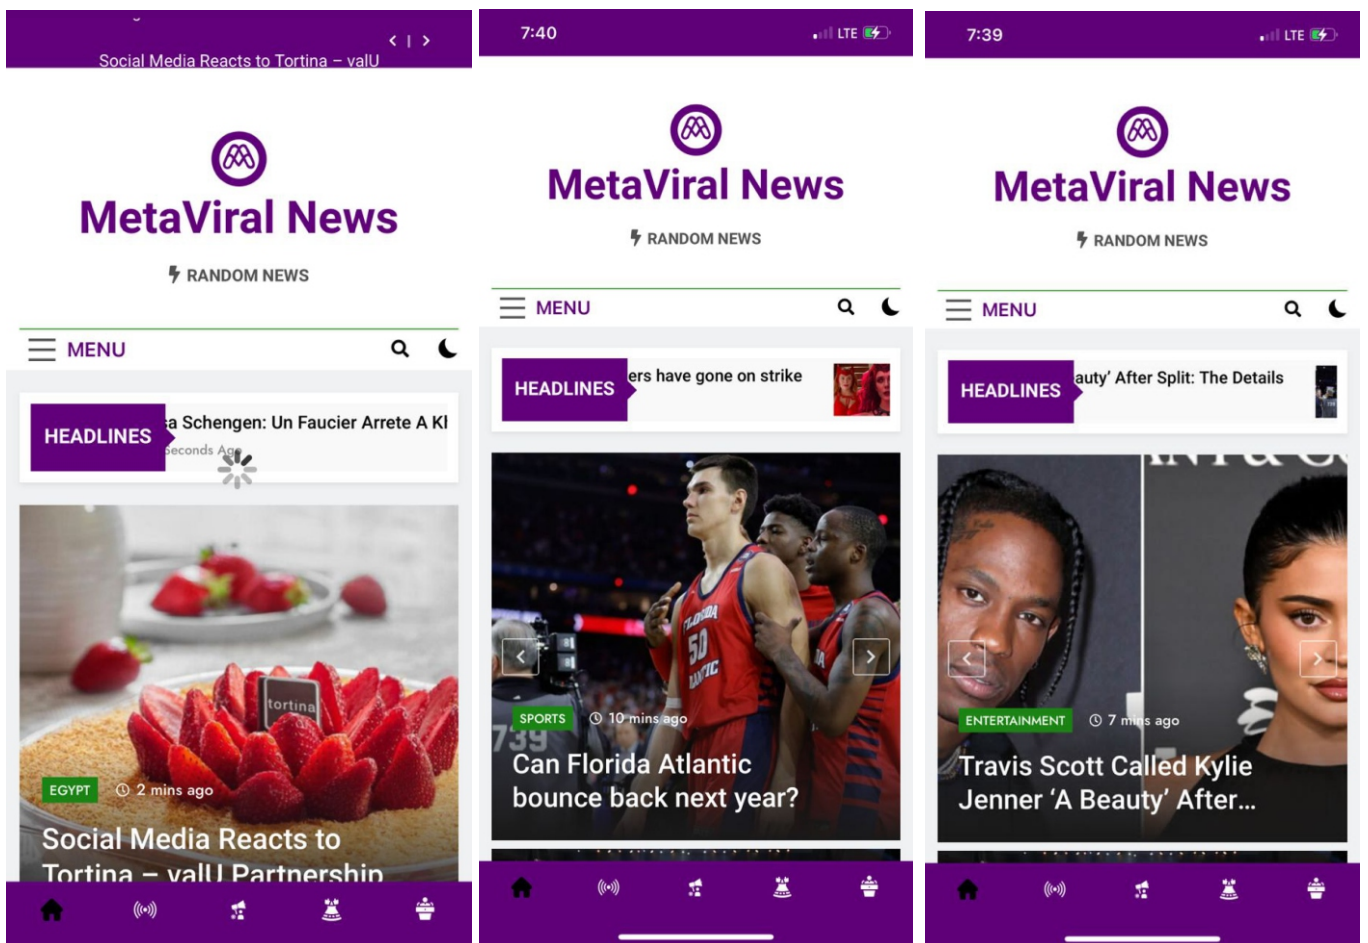

Metaverse 360 provides incisive coverage of the rapidly evolving Metaverse market. This includes technologies such as virtual reality (VR), augmented reality (AR) and innovations in web 3.0. Like in other “deep tech industries”, these have the potential to disrupt existing industries and create brand new market.

METAVIRAL NEWS

Metaviral News provides latest breaking news varying from various scopes of disciplines such as politics, sports, entertainment, fashion and many others across the nations of the World.

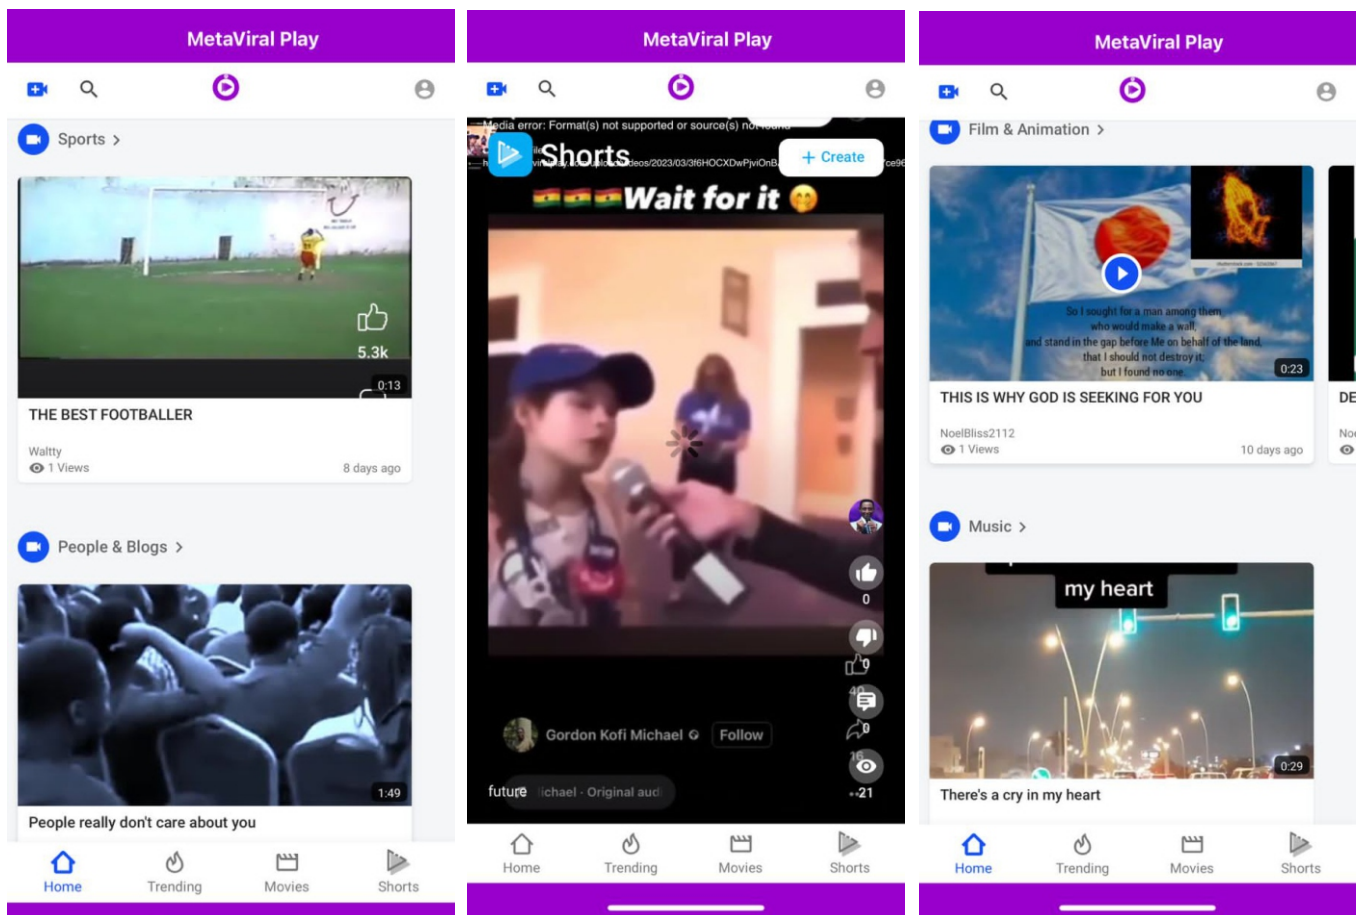

METAVIRAL PLAY

MetaViral Play is an online video sharing social media platform. It allows to share your video contents to a large following either by subscription or free.

Meta Viral Play provides earning for all your video content viewing.

CRYPTO ADOPTION

One of the very important issues that needs a solution on the CRYPTO currency platforms is “CRYPTO ADOPTION”. The MetaViral Network seeks to improve the adoption rate through its social media network.

Our system is set to making the core membership of our social media platform users of crypto currency. In this space, all account holders of all our social media apps become automatic users of our blockchain native coin.

All reactions on our social media platforms creates transactions on the blockchain and users are credited with various forms of earnings in their respective wallets.

Every reaction receives earnings. For example Post receives different earnings from like, comment, view and share. Our social media platforms are the first in the world to reward content users and content providers at the same time.

Our affiliate system in our social media space allows us to grow organically at a fast rate because each user must have 1000 people use his or her affiliate link before he or she can withdraw earnings

Our aim is to grow our community to one billion social media users who also doubles as one billion crypto currency user within 5 years.

Smart Chain

We have developed our smart chain successfully. It supposes to launch in January 2023 or a little bit earlier.

Purpose

Bringing the crypto and metaverse community together on one social media platform and having a dedicated community for the metaverse and crypto world.

MetaViral social community app is readily available on Apple store and google play store. This app seeks to bring a one stop shop for the crypto community to enhance social community. The final version of this app will have the following features. Posting Photos, Posting Videos, Live video streaming to enhance AMA sections. Live video conferencing, live audio conferencing to secure private meetings for the MetaVerse and crypto community. Users will also have direct access to mint their Photos, Videos and audio directly on our NFT platform.

MetaViral Project

MetaViral

[http:// www.MetaViralscan.com](http://www.MetaViralscan.com)

MetaViral is a decentralized cryptocurrency built on MetaViral blockchain (MBC) and available on MetaViral SmartChain (MSC), aiming to build an economic and financial ecosystem based on the COIN 'MetaViral' to help any organization that needs to build trust at a low cost and construct a distributed financial book and accounting system with bank-grade security. Our SmartChain offers the lowest cost in terms of gas fees. The ultimate aim is to make the ecosystem accessible to all, bridging the gap between the low income earners and upper income earners when it comes to transaction cost and speed in delivery. Finally we are integrating social media into web 3 platforms to ensure the social life of the crypto community is brought alive through networking to foster faster business. MetaViral Coin is natively built on its own blockchain. MetaViral Coin is the governing coin of the MetaViral Project. It is built on MetaViral Explorer (<http://www.MetaViralscan.com>). The MetaViral Project has put together a CENTRALISEDEXCHANGE (<https://MetaViralexchange.com>) and a DECENTRALISED EXCHANGE (<https://MetaViralswap.com>) to help new projects list with ease and at no cost. Listing Verified projects will totally remain free of Charge on both our CEX and DEX.

What are the potential benefits of using a DEX?

Vast variety

MetaViral DEXs provide an almost unlimited selection of coins, ranging from the well-known to the strange and completely random. Because anyone may construct a MTV-based coin that is an Eco-Friendly blockchain and form a liquidity pool for it, there will be a wider range of projects, both verified and unvetted.

Hacking risks can be reduced

Because all funds in a DEX trade are housed in the traders' own wallets, they are less vulnerable to a hack. Holders can be satisfied by adopting MetaViral DEX because hacking threats are reduced to a bare minimum.

Utility in the developing world

MetaViral DEX's peer-to-peer trading, fast transactions and anonymity have made it increasingly attractive in developing markets where reliable banking infrastructure may not be accessible. An MetaViral DEX is accessible to everyone with a smartphone and an internet connection.

MetaViral Exchange

[http:// www.MetaViralcex.com](http://www.MetaViralcex.com)

A decentralized trading platform on MetaViral will be added, satisfying the need for fully decentralized payments. MetaViral is on MetaViral making it easy and convenient to connect and process transactions, breaking any user-touchable space close to the future world of the dominant cryptocurrency.

MetaViral guarantees outstanding speed of coin processing and extremely low transaction fees so that the community can easily connect. MetaViral is an easy, fast, and secure exchange creating a completely new ecosystem, built to facilitate a crypto derivative market where traders have access to a variety of trading and investment instruments, enabling a highly liberating, strategic, low-risk, and seamless trading experience in a truly decentralized way.

A decentralized exchange (or DEX) is a peer-to-peer marketplace where transactions occur directly between crypto traders. MetaViral is an easy, fast, and secure exchange in a truly decentralized way. We are going to create an ecosystem where people will launch their own decentralized exchange. MetaViral is a peer-to-peer (P2P) that connects buyers and sellers where the people can exchange their coins for the desired one. The Exchange is non-custodial, meaning a user remains in control of their private keys when transacting on a DEX platform.

Advantages

- Powerful Matching Engine
- Multi-layer Security
- Preferred Trader Selection
- Admin Panel
- Support Team

Why choose MetaViral

Open for global participants

Transparency & Immutability

Free from corporate and government interference

Lower Fees and Security

Blockchain compliant

Transaction Traceability

Utility coin

Ease of use

Prize Pools

Safe & Secure

MetaViral liquidity

Providers of liquidity are compensated with LP coins. Users pay trading fees on DEX, which are distributed to liquidity providers based on the number of LP coins or percentage stake they control in the pool.

The MetaViral protocol ensures that the assets of coin holders are promptly seized and frozen for liquidity. The major objective is to keep the holder aware of MetaViral's performance by preventing huge drops in bulk trade-offs. The DeFi, like the Safe Moon coin, has a high price value with little volatility in the trading market.

Automatic LP is MetaViral's secret. We have a function here that serves a dual purpose for holders. To begin, the contract takes coins from both sellers and buyers and deposits them in the LP, therefore providing a steady price floor. Second, the penalty acts as an arbitrage-resistant mechanism, guaranteeing that the MetaViral supply stays secure as an incentive for holders. In theory, the extra LP offers stability by adding the tax to the coin's total liquidity, so increasing the coin's overall liquidity and preserving the coin's price floor.

This is in contrast to the burn function of other reflection coins, which benefits only in the short term from the specified supply reduction. The MetaViral LP's price stability mirrors this function, but with the extra benefit of a fixed price floor and cushion for holders. The goal is to minimize larger price declines when whales sell their coins later in the game, preventing the price from fluctuating as much as it would without the automatic LP mechanism. This is all to alleviate some of the shortcomings of the current DeFi reflection coins. As a result, we are certain that our system and protocol will defeat outmoded reflection coins. We are certain that our approach and protocol will defeat outmoded reflection coins.

METAVIRAL TREASURY AND RESERVES

One of the main components of MetaViral is to stock Gold in its reserves and treasury. Thirty percent (30%) to Fifty percent (50%) of circulating cap will be used to purchase and mint real Gold into the following.

- A) MetaViral Gold Coin (1 Ounce)**
- B) MetaViral Gold Mini Bar (1 Kilogram)**
- C) MetaViral Gold Midi Bar (25 Kilograms)**
- D) MetaViral Gold Maxi Bar (50 Kilograms)**

These Gold Coins and Bars will be stocked in reputable Gold Banks and vaults and current values and reserves shown live on MetaViral Smartchain, MetaViral Exchange, MetaViral Dex and All MetaViral Social Media Platforms at all times.
